

MIRIYALA SAIKIRAN

Full Stack Developer | Software Development Intern

+91 8121388820 | ramakrishnamiriyala1977@gmail.com | Visakhapatnam, India | LinkedIn: [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Developer pursuing B.Tech in Computer Science (CGPA: 9.18) with hands-on experience building scalable, responsive web applications using React.js, Node.js, JavaScript, and MySQL. Demonstrated ability to deliver end-to-end solutions incorporating REST APIs, role-based authentication, and database design. Eager to contribute to real-world software engineering challenges as a Software Development Intern.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Java
Frontend	React.js, HTML5, CSS3, Responsive Design
Backend	Node.js, Express.js, REST APIs
Databases	MySQL, MongoDB, Supabase
Tools & VCS	Git, GitHub, VS Code, Cursor, Vercel
Concepts	Role-Based Auth, CRUD Operations, MVC Architecture, Agile Development

EDUCATION

B. Tech in Computer Science and Engineering

Aug 2024 – Jun 2028

Vignan's Institute of Information Technology, Duvvada, Visakhapatnam

CGPA: 9.18 / 10.0

PROJECTS | PRACTICAL EXPERIENCE

Smart Doubt Exchange Platform

May 2026 – Jun 2026

Tech Stack: React.js, Supabase, JavaScript, CSS | [Live Demo](#)

- Developed a full-stack web platform enabling students to post academic doubts anonymously and receive answers from teachers and peers, improving knowledge sharing and collaboration.
- Implemented secure role-based authentication (student/teacher roles), real-time doubt posting, image upload support, keyword search, and subject-wise categorization using Supabase as the backend-as-a-service.
- Designed a fully responsive, accessible UI optimized for cross-device usage, leading to improved user engagement and interaction.

Smart Crop Advisory System

May 2025

Tech Stack: React.js, Node.js, Express.js, MySQL | [Live Demo](#)

- Built a full-stack crop recommendation platform using React.js, Node.js, and MySQL that analyzes soil parameters, weather data, and seasonal conditions to suggest optimal crops for farmers.
- Integrated a live weather forecasting API and an AI-powered pest/disease prediction module, enabling farmers to make data-driven agricultural decisions and reduce crop loss.
- Designed and optimized a relational MySQL database schema for crop, soil, and environmental data, improving system recommendation accuracy and overall resource efficiency.
